

## Ramsar Site Information Sheet (RIS) – 2012 revision

---

### NOTES TO COMPILERS

1. The RIS must be completed in one of the Convention's three working languages, namely English, French, or Spanish. The RIS and the accompanying *Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance of the Convention on Wetlands* are available in each of these three working languages. Please **read the guidance in the Strategic Framework before starting to complete the Ramsar Information Sheet**. It provides significant guidance on each section in the Information Sheet.
2. Once completed the RIS and map(s), should be officially submitted to the Ramsar Secretariat by the Administrative Authority of the Contracting Party concerned.
3. The information provided by Contracting Parties in the RIS, including any supplementary information, and held in the Ramsar Sites Database is also made publicly available through the Ramsar Site Information Service website (<http://ramsar.wetlands.org>).
4. **Important note on completion of RIS fields.** Please note that it is **not** expected that most Contracting Parties will be able to complete all fields for all Ramsar Sites. Data, information and capacity are all variable worldwide and develop through time. Compilers should consider the following principles:
  - a) **If no information exists relating to a specific field, please leave this field uncompleted** (or indicate 'unknown'). After completing the RIS, an overall assessment of those issues that are lacking information should guide future priorities for research and survey at the site (for example, within the context of the site's management plan).
  - b) **Recording some information – even if this is an incomplete or merely provisional assessment – is more useful than giving no information at all.** Provisional assessments of knowledge are useful and can be expanded in subsequent updates of the RIS, so Parties are urged to complete as much of the form as possible.
  - c) Please focus on the following sections as priorities for completion (to the extent that available information allows): Part 1 (fields 1-11), Part 2 (field 12) and the ecological character statement in field 13 of Part 3. Part 4 (fields 28-35) contains important information on site management and should be completed if possible.

5. Examples of completed RISs in this 2012 revision format are available at <http://ris-2012.wikispaces.com><sup>1</sup>, and it is strongly advised that these are reviewed before compiling this form.
6. Fields back-shaded in light blue relate to data and information required **only** for RIS updates.
7. In order to assist Contracting Parties when they are preparing an RIS update for a designated Ramsar Site, for each of the fields in the 2012 revision format, a cross-reference is provided to the equivalent field in the RIS 2009-2012 version.
8. Note that some fields concerning aspects of Part 3, the ecological character description of the RIS (tinted in purple), are **not** expected to be completed as part of a standard RIS, but are included for completeness so as to provide the requested consistency between the RIS and the format of a 'full' Ecological Character Description, as adopted in Resolution X.15 (2008). If a Contracting Party does have information available that is relevant to these fields (for example from a national format Ecological Character Description) it may, if it wishes to, include information in these additional fields.

## Part 1.2 About the site's location

### 7. Defining the site

The provision of a map with clearly defined boundaries is required for Ramsar Site listing. This question is about the format of the map provided.

A map of the site, with clearly delineated boundaries, is provided in both the following formats:

- i) a GIS shape file providing geo-referenced site boundary (preferably World Geodetic System 1984) and attribute table (see Appendix C of the Strategic Framework for guidance, including if it is not possible to provide a GIS shape file): ☐
- ii) a map in electronic format (e.g., a JPEG or ArcView image): ☐

At the discretion of the Contracting Party, it would be helpful if an additional written description of the boundary of the site (and any associated defining features such as boundary at the low or high watermark for coastal sites) can be provided here:

For further guidance see section 7.2.7 and especially Appendix C of the *Strategic Framework*.

Field #7 from RIS 2009-2012 version

### 8. Geographical coordinates

Provide the coordinates of the approximate centre of the site expressed in degrees, minutes, and seconds of latitude and longitude (e.g., in the format: 01°24'15"S 104°16'12"E or 010°30'15"N 084°51'28"W):

	Degrees (°)	Minutes (')	Seconds (")	N or S; E or W
Latitude				
Longitude				

For further guidance see section 7.2.8 of the *Strategic Framework*.

Field #8 from RIS 2009-2012 version

If the site is composed of more than one separate area, also provide central coordinates for each of these sub-areas:

<i>Sub-area name: [xxx]</i>	Degrees (°)	Minutes(')	Seconds (")	N or S; E or W
<b>Latitude</b>				
<b>Longitude</b>				

<i>Sub-area name: [xxx]</i>	Degrees (°)	Minutes(')	Seconds (")	N or S; E or W
<b>Latitude</b>				
<b>Longitude</b>				

Add further coordinates if more than two sub-areas

## 9. General location

### 9a. Geographic location

a) In which large administrative region does the site lie?

b) What is the nearest town or population centre?

For further guidance see section 7.2.9 of the *Strategic Framework*.

Field #9 from RIS 2009-2012 version

## Part 2. Why is this site internationally important? (Criteria for designation)

### 12. Ramsar Criteria and their justification

Tick the box against each Criterion applied to the designation of the Ramsar Site. All Criteria which apply should be ticked.

**PLEASE NOTE** that this section gives an overall summary of which Criteria apply to the site. After completing the first part, please add further information concerning specific plant species (12a), plant communities (12b), animal species (12c) and animal communities (12d), as appropriate, to provide further details on the detailed reasons why each of the Criteria is fulfilled.

### Part 3. What is the site like? (Ecological character description)

#### 13. What are the critical ecological components, processes and services that determine the ecological character of this Ramsar Site?

Please describe which of the ecological components described in Part 3.1 below, together with the ecological processes described in Part 3.3 below, are critical to determining the ecological character of this Ramsar Site. Please also describe natural variability in the ecological character of the site (either seasonally, or longer-term if known), and any known past and current trends in ecological character in part, or all, of the site.

Please see section 7.3.1 of the *Strategic Framework* for further information on completing this section and <http://ris-2012.wikispaces.com> for worked examples.

#### Part 3.1 Ecological components

#### 14. Climate

Please indicate the prevailing climate type, using the widely adopted Köppen-Gieger Climate Classification System as appropriate.

Please tick all climatic categories that apply to the site:

<b>Provisioning Services</b> – products obtained from the ecosystem such as food, fuel and fresh water				
Food for humans	Sustenance for humans (e.g., fish, molluscs, grains)	<input type="checkbox"/>		
Fresh water	Drinking water for humans and/or livestock	<input type="checkbox"/>		
	Water for irrigated agriculture	<input type="checkbox"/>		

	Water for industry	<input type="checkbox"/>	
	Water for energy production (hydro-electricity)	<input type="checkbox"/>	
Wetland non-food products	Timber	<input type="checkbox"/>	
	Fuel wood/fibre	<input type="checkbox"/>	
	Peat	<input type="checkbox"/>	
	Livestock fodder	<input type="checkbox"/>	
	Reeds and fibre	<input type="checkbox"/>	
	Other	<input type="checkbox"/>	
Biochemical products	Extraction of material from biota	<input type="checkbox"/>	
Genetic materials	Medicinal products	<input type="checkbox"/>	
	Genes for tolerance to certain conditions (e.g., salinity)	<input type="checkbox"/>	
	Genes for resistance to plant pathogens	<input type="checkbox"/>	
	Ornamental species (live and dead)	<input type="checkbox"/>	
<b>Regulating Services</b> – benefits obtained from the regulation of ecosystem processes such as climate regulation, water regulation, and natural hazard regulation			
Maintenance of hydrological regimes	Groundwater recharge and discharge	<input type="checkbox"/>	
	Storage and delivery of water as part of water supply systems for agriculture and industry	<input type="checkbox"/>	
Erosion protection	Soil, sediment and nutrient retention	<input type="checkbox"/>	
Pollution control and detoxification	Water purification/waste treatment or dilution	<input type="checkbox"/>	
Climate regulation	Local climate regulation/buffering of change	<input type="checkbox"/>	
	Regulation of greenhouse gases, temperature, precipitation and other climatic processes	<input type="checkbox"/>	
Biological control of pests and disease	Support of predators of agricultural pests (e.g., birds feeding on locusts)	<input type="checkbox"/>	
Hazard reduction	Flood control, flood storage	<input type="checkbox"/>	
	Coastal shoreline and river bank stabilization and storm protection	<input type="checkbox"/>	
<b>Cultural Services</b> – the nonmaterial benefits people obtain from ecosystems such as through spiritual enrichment, cognitive development, reflection, recreation, and aesthetic experiences			

Recreation and tourism	Recreational hunting and fishing	<input type="checkbox"/>	
	Water sports and activities	<input type="checkbox"/>	
	Picnics, outings, touring	<input type="checkbox"/>	
	Nature observation and nature-based tourism	<input type="checkbox"/>	
Spiritual and inspirational	Inspiration	<input type="checkbox"/>	
	Cultural heritage (historical and archaeological)	<input type="checkbox"/>	
	Contemporary cultural significance, including for arts and creative inspiration, and including existence values	<input type="checkbox"/>	
	Spiritual and religious values	<input type="checkbox"/>	
	Aesthetic and “sense of place” values	<input type="checkbox"/>	
Scientific and educational	Educational activities and opportunities	<input type="checkbox"/>	
	Important knowledge systems, importance for research (scientific reference area or site)	<input type="checkbox"/>	
	Long-term monitoring site	<input type="checkbox"/>	
	Major scientific study site	<input type="checkbox"/>	
	‘Type location’ for a taxon	<input type="checkbox"/>	
<b>Supporting Services</b> – services necessary for the production of all other ecosystem services such as water cycling, nutrient cycling and habitat for biota. These services will generally have an indirect benefit to humans or a direct benefit over a long period of time.			
Biodiversity	Supports a variety of all life forms including plants, animals and microorganisms, the genes they contain, and the ecosystems of which they form a part	<input type="checkbox"/>	
Soil formation	Sediment retention	<input type="checkbox"/>	
	Accumulation of organic matter	<input type="checkbox"/>	
Nutrient cycling	Storage, recycling, processing and acquisition of nutrients	<input type="checkbox"/>	
	Carbon storage/sequestration	<input type="checkbox"/>	
Pollination	Support for pollinators	<input type="checkbox"/>

Where economic studies or assessments of economic valuation have been undertaken at the site, it would be helpful to provide information on where the results of such studies may be located (e.g. website links, citation of published literature):

## 27. Social or cultural values

Is the site considered internationally important for holding, in addition to relevant ecological values, examples of significant cultural values, whether material or non-material, linked to its origin, conservation and/or ecological functioning? If so, please describe this importance under one or more of the following categories:

Type of social or cultural importance	Applicable?	Description if applicable
i) sites which provide a model of wetland wise use, demonstrating the application of traditional knowledge and methods of management and use that maintain the ecological character of the wetland	<input type="checkbox"/>	
ii) sites which have exceptional cultural traditions or records of former civilizations that have influenced the ecological character of the wetland	<input type="checkbox"/>	
iii) sites where the ecological character of the wetland depends on the interaction with local communities or indigenous peoples	<input type="checkbox"/>	
iv) sites where relevant non-material values such as sacred sites are present and their existence is strongly linked with the maintenance of the ecological character of the wetland	<input type="checkbox"/>

Please indicate which of the following apply to the site. If more than one category applies to the site, please indicate all that are relevant.

Site-specific plan or management planning being implemented ☐

Site-specific plan or management planning exists but has not yet been implemented ☐

Site-specific plan or management planning in preparation ☐

Current site-specific plan or management planning subject to review and update ☐

No site-specific plan or management planning exists at present ☐

No information available ☐

Management plan/planning covers:

All of Ramsar Site; or ☐

Part of Ramsar Site ☐

Has a management effectiveness assessment been undertaken for the site? Yes ☐

No ☐

Please give link to site-specific plan or other relevant management planning if this is available via the Internet:

If the site is a formal transboundary site as indicated in RIS field 9b above, are there shared management planning processes with another Contracting Party? Yes ☐

No ☐

Please indicate if a Ramsar centre, other educational/visitor facility, or educational/visitor programme is associated with the site?
