

Decision III/15**Possible effects of the Basel Convention on the transboundary movements of reclaimed ozone-depleting chemicals**

The Conference,

Referring to decision II/15 of COP2 and to further consultations with the Contracting Parties and Secretariat of the Montreal Protocol, agrees that:

1. The controlled substances of the Montreal Protocol which are reclaimed and purified to usable purity specifications prescribed by appropriate international and/or national organizations including the International Standards Organization (ISO) do not fall under the scope of the Basel Convention.
