

13th Meeting of the Conference of the Contracting Parties to the Ramsar Convention on Wetlands

"Wetlands for a Sustainable Urban Future"

Dubai, United Arab Emirates, 21-29 October 2018

Resolution XIII.24

The enhanced conservation of coastal marine turtle habitats and the designation of key areas as Ramsar Sites

- NOTING that six out of seven species of marine turtle (Dermochelyidae: Dermochelys coriacea; Cheloniidae: Chelonia mydas, Caretta caretta, Eretmochelys imbricata, Lepidochelys olivacea, Lepidochelys kempii, Natator depressus) have a conservation status ranging from vulnerable to critically endangered according to criteria of the IUCN Red List of threatened species; and ALSO NOTING that in order to live and survive these species depend on a variety of coastal habitats throughout their life cycle;
- RECALLING that the Conference of the Contracting Parties to the Convention has adopted several Resolutions that are relevant and can benefit the conservation of habitats important for marine turtles: Resolution VII.21 on Enhancing the conservation and wise use of intertidal wetlands; Resolution VIII.4 on Wetland issues in Integrated Coastal Zone Management (ICZM); and Resolution VIII.32 on Conservation, integrated management, and sustainable use of mangrove ecosystems and their resources;
- 3. CONSIDERING that habitats that are home to endangered marine turtle species meet Criterion 2 of the Convention's Criteria for Identifying Wetlands of International Importance and that, consequently, the Convention can play a role by encouraging Contracting Parties to strengthen their management and conservation actions related to the wetland habitats that are essential to these species;
- 4. ALSO CONSIDERING that marine turtles are included in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora and Appendices I and II of the Convention on the Conservation of Migratory Species of Wild Animals (CMS), and are addressed by regional instruments and international organizations such as the Berne Convention on the Conservation of European Wildlife and Natural Habitats, the Abidjan Convention on Cooperation in the Protection, Management and Development of the Marine and Coastal Environment of the Atlantic Coast of the West, Central and Southern Africa Region, the Inter-American Convention for the Protection and Conservation of Sea Turtles (IAC), the Cartagena Convention for the Protection and Development of the Marine Environment in the Wider Caribbean Region, the Barcelona Convention for the Protection of the Mediterranean Sea against Pollution, the CMS Memorandum of Understanding on the Conservation and Management of Marine Turtles and their Habitats of the Indian Ocean and South-East Asia (IOSEA Marine Turtles MOU), and the CMS MOU concerning Conservation Measures for Marine Turtles of the Atlantic Coast of Africa (African Atlantic Turtles MOU), the Secretariat of the

- Pacific Regional Environment Programme, and the Permanent Commission for the South Pacific, under which their members have committed to enhance protection for marine turtles;
- 5. NOTING the existence of additional action plans such as, for example, the Pacific Islands Regional Marine Species Programme's Marine Turtle Action Plan and the Single Species Action Plan for the loggerhead turtle *Caretta caretta* in the South Pacific Ocean, adopted by the Conference of the Parties to the CMS in Quito in November 2014, and the development of the Single Species Action Plan for the conservation of the hawksbill turtle (in accordance with CMS COP12 Decision 12.17);
- 6. NOTING that some marine turtle subpopulations, such as northwest Atlantic loggerhead turtles, have increased as a result of significant conservation efforts, which include prohibiting or modifying fishing practices, designating protected areas and addressing light pollution;
- 7. CONCERNED that several regional populations of marine turtle are facing a high risk of extinction; NOTING the degradation of their coastal habitats, the significant impact of fisheries bycatch; and ALSO NOTING the excessively high mortality rates owing to egg collection, killing or poaching of adult females on the nesting beaches and the impact of native or introduced predators, as well as natural mortality of eggs and hatchlings;
- 8. CONSIDERING that marine and coastal feeding and nursery areas that are used by marine turtles during their life cycle such as, *inter alia*, estuaries, seagrass beds, coral reefs and mangroves, are often threatened physically and chemically by human activities such as urban, industrial, port and tourism development and infrastructure as well as discharges of wastewater and industrial effluents, and agricultural runoff;
- 9. RECOGNIZING the potential and demonstrated role of indigenous peoples¹ and local communities including women and other vulnerable groups in marine turtle conservation and management;
- 10. CONSIDERING that the protection of nesting beaches, marine and coastal feeding areas, nurseries and growth areas will improve the survival rate of adult females, hatchlings and immature turtles and that their designation as Wetlands of International Importance (Ramsar Sites) is a first step towards an enhanced protection;
- 11. NOTING that Resolution 12.25 on *Promoting Conservation of Critical Intertidal and Other Coastal Habitats for Migratory Species* adopted by the twelfth session of the Conference of the Parties to CMS (Manila, October 2017) urges those Parties to conserve intertidal and coastal habitats for migratory species;
- 12. FURTHER NOTING that CMS Resolution 12.23 on *Sustainable Tourism and Migratory Species* outlines general principles for ensuring that tourism activities benefit from and do not harm migratory species, including involvement of and benefits to local communities;
- 13. NOTING that 248 Ramsar Sites and 76 Contracting Parties (listed at Annex 1 of the present Resolution) already provide habitat for at least one species of marine turtle;

Ramsar COP13 Resolution XIII.24

¹ In compliance with national laws and rules.

- 14. RECOGNIZING that the African Atlantic Turtles MoU and the IOSEA Marine Turtles MoU of CMS have adopted resolutions the application of which can help improve the conservation of marine turtles; and
- 15. RECALLING that an MoU has been signed between the IAC Secretariat and the Secretariat of the Ramsar Convention and that its goal is to join the efforts made in the frameworks of the two Conventions, with the aim of building capacities of the Parties of both Conventions to identify and strengthen the conservation and wise use of Ramsar Sites;

THE CONFERENCE OF THE CONTRACTING PARTIES

- 16. ENCOURAGES the Contracting Parties whose coastlines contain marine turtle breeding areas, nesting beaches, coastal migration corridors and feeding and nursery areas to identify index nesting and foraging sites and ensure the populations are monitored as precisely as possible, in order to improve our knowledge of the distribution, numbers and state of health of each of the species involved:
- 17. ENCOURAGES the Contracting Parties to strengthen the conservation and management of the identified index nesting and foraging sites, and notably, if possible, to designate them as Wetlands of International Importance (Ramsar Sites), based on Criterion 2 of the Convention's Criteria for Identifying Wetlands of International Importance, and to strengthen this designation through the promulgation of the appropriate protective measures in accordance with their legislation and the availability of resources, in particular through the creation of marine protected areas, as appropriate;
- 18. ENCOURAGES the Contracting Parties to develop and implement management plans for these sites, by integrating specific means for the conservation, protection or restoration of coastal habitats for the different marine turtle species, and to integrate these site management plans with coastal zone management plans;
- 19. ENCOURAGES the Contracting Parties to consult each other, and work through existing regional agreements, MoUs and action plans, such as those mentioned in paragraph 4 of the present Resolution, to protect habitats in networks that allow for greater safety for marine turtles during their life cycle and in their movements;
- 20. STRESSES the urgent need to take the measures required, whenever possible, to reduce threats to nesting areas, such as noise and light pollution and beach erosion, and to control native predators and eradicate introduced predators at these sites, to develop best practices to guide the interaction of humans and marine turtles by raising the awareness of inhabitants of and visitors to coastal zones, leveraging the prestigious Ramsar brand and the Convention's communication, capacity building, education, participation and awareness (CEPA) programme;
- 21. ENCOURAGES Contracting Parties with marine turtle habitats to promote the wise use of these wetlands by working with local communities, relevant stakeholders and institutions to raise awareness of the importance of conserving marine turtles, their nests and their habitats, and to halt poaching and the exploitation of marine turtle products, including through, *inter alia*, fostering alternative sustainable livelihoods, including sustainable eco-tourism;
- 22. ENCOURAGES Contracting Parties to review their Ramsar Site management plans to seek to ensure they include marine turtle conservation actions, as appropriate; and RECOMMENDS

- enhancement of synergies and better coordination with Ramsar Regional Initiatives and existing networks rather than establishment of new arrangements;
- 23. URGES Contracting Parties to undertake collaborative research on impacts of climate change on marine turtles and their wetland habitats; and REQUESTS the Scientific and Technical Review Panel, consistent with its scope, mandate and priority thematic work areas for 2019-2021, in developing its proposed work plan for presentation at the 57th meeting of the Standing Committee, to consider developing methods to rapidly assess climate vulnerability of wetlands, particularly those important as habitats for marine turtles; and
- 24. REQUESTS the Secretariat to work with the Secretariats of the Inter-American Convention for the Protection and Conservation of Sea Turtles and the Convention on the Conservation of Migratory Species of Wild Animals as well as their respective memoranda of understanding, (including the the CMS MoUs on the Conservation and Management of Marine Turtles and their Habitats of the Indian Ocean and South-East Asia and on Conservation Measures for Marine Turtles of the Atlantic Coast of Africa) to enhance marine turtle conservation in Ramsar Sites; and ALSO REQUESTS that, where possible and subject to the availability of resources, these Secretariats work with Ramsar Contracting Parties to include marine turtle conservation actions in their Ramsar Site management plans.

Annex 1

Existing Ramsar Sites with coastal and marine turtle habitats²

Sources:

Ramsar Sites information service: https://rsis.ramsar.org/

Information on Ramsar Sites in the western hemisphere with sea turtles present and so included in this list can also be found in the report prepared by the Secretariat of the Inter-American Convention for the Protection and Conservation of Sea Turtles with the support of the Ramsar Secretariat entitled *Wetlands of international importance and sea turtle conservation*. The link for the report is: http://www.iacseaturtle.org/eng-docs/publicaciones/humedales-tortugas-marinas-ing-peq.pdf

Species involved (nesting beaches, nursery areas, feeding areas)*:

Lepidochelys olivacea = Lo (IUCN Red List status: Vulnerable)

Lepidochelys kempii = Lk (IUCN Red List status: Critically Endangered)

Chelonia mydas = Cm (IUCN Red List status: Endangered)

Chelonia agassizii or C. mydas agassizii = Ca (IUCN Red List status: Endangered)

Caretta caretta = Cc (IUCN Red List status: Endangered)

Eretmochelys imbricata = Ei (IUCN Red List status: Critically Endangered)

Dermochelys coriacea = Dc (IUCN Red List status: Vulnerable)
Natator depressus = Nd (IUCN Red List status: Data Deficient)
